Projects Handled

⇔ **MORE RETAIL**
     Team Size: 2   Role: React.js Developer
     Technologies: React.js.
     Responsibilities: Coding, analysis

     Scope: It's an e-commerce dashboard where admin, Supervisor, User could see products related information
          like, in case of user details tracking information.

⇔ **PHILIPS MACHINIST**
     Team Size: 2   Role: React.js Developer
     Technologies: React.js, Redux.js, SASS.
     Responsibilities: Coding, analysis.

     Scope: It contained a dashboard where we can see the details information's of machines parts and their
     reports as well.

⇔ **DOCU E-SIGN**
     Team Size: 2   Role: React.js Developer
     Technologies: React.js.
     Responsibilities: Coding, analysis, client communication.

     Scope: It was a block chain project where user visit the application and select the online documents like
     business documents, divorce documents and all other documents. He/she can select any of the documents
     add it to the cart and pay for it by a payment gateway process (Stripe payment gateway). He/she can view
     the document. There was a section where he can view the document and finally he can share it through the
     second party/third party for the e-signature and client can upload the document on block chain.

⇔ **AGROCEL**
Team Size: 2   Role: React.js Developer
Technologies: React.js, Redux.js, React strap.

Responsibilities: Coding, analysis, client communication.

Link: https://dms.agrocel.net/

Scope: It was a commercial project. I was working on the project as a lead with one newly joined fresher. I handled the project from scratch. Mainly it had five roles TM-Territory Manager, SH-State Head, NH-National head, BH- Business Head and an Admin. It was a long run project as it had five roles. In it we were showing menus based on login user only. It had no permissions of other pages to view to unauthorized users. It took us eight months to accomplish the task. I faced many challenges during the project but achieved it.
